

Work of Art | Activity 20 | Testing session summary

On the 14th of May 2014 there was a testing session held in the National Museum in Kraków. Two groups (14 participants) were asked to try the prototypes and share their opinion. Here we present the results.

QUESTIONS ASKED:

GENERAL QUESTION FOR THE BEGINNING: What do you think about this kind of e-learning as a complementary learning material?

- Do you think it will help you learn?
- What advantages do you see in this solution?
- What disadvantages do you see in this solution?
- Would you use it at work or at home?
- What else can we do to help you learn new language?

FINDINGS:

GENERAL FINDINGS (WHAT THE GROUP HAS SAID)

- **they liked the material very much;**
- **they appreciated the material is exactly for them, teaching exactly what they need;**
- they told us the material is cool;
- they told us the material is easy to use;
- they told us they feel a need for learning foreign languages;
- they liked they can use it and practice anytime/many times;
- they don't have time for it; at home they have other duties, at work they have to be careful and attentive all the time;
- without being forced to do this, it will be hard for them (discipline);
- in one group they've asked for instructions in polish;
- they would like to get printed material in form of crib sheet; short and easy to use;
- most of them live out of the town so they don't have a quick internet connection, the material should be light and easy to stream;

GENERAL FINDINGS (MY OBSERVATION)

- before letting people use the material, an instructor should show them how to use it;
- those simulations were hard/challenging for the group;

INSTRUCTIONAL DESIGN (WHAT THE GROUP HAS SAID)

Lifelong Learning Programme | Leonardo da Vinci Partnerships
Project 2012-1-PT1-LEO04-11978 1 "Work of Art"

Testing session summary

- the answers are too long;

INSTRUCTIONAL DESIGN (MY FINDINGS)

- 2 ending slides are confusing -> should be changed to one slide only;
- some people clicked the sound icon instead of the button (button and sound icon should be separated).
